SCADAmetrics' MODBUS®/Meter Gateway Compatible With Metron-Farnier Water Meters.

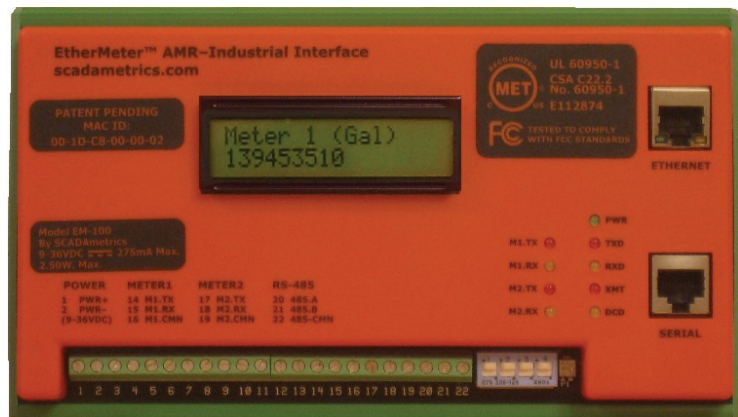

St. Louis, Missouri
27 Feb 2009

SCADAmetrics recently completed compatibility testing of Metron-Farnier's new, 6-digit *HawkeyeOER* meter register; and the tests verified that its EtherMeter™ SCADA/Meter Gateway was able to successfully auto-detect and interrogate the register without exception.

EtherMeter™-compatibility means that totalization and flow-rate data from Metron-Farnier's meters may now be interrogated, error-free, using the MODBUS® protocol.

**Spectrum Single-Jet Water Meter
And HawkeyeOER Register
By Metron-Farnier**

**EtherMeter™
SCADA/Meter Gateway
By SCADAmetrics**

Compatibility with SCADAmetrics' Touch-Read Filter was also verified. As a consequence, the register may also be concurrently interrogated by an AMR touch-read system.

The complete, up-to-date list of EtherMeter™-compatible registers is maintained in the Compatibility Matrix at scadametrics.com.

The test register was provided courtesy of Metron-Farnier (Boulder, CO, USA, 303-449-8833). To learn more about Metron-Farnier's line of meters and the *HawkeyeOER* register, please visit www.metronfarnier.com.

ABOUT SCADAmetrics –

SCADAmetrics is a manufacturer of SCADA/Meter Gateways, with a focus on devices that help System Integrators read water meters using the MODBUS® protocol.
