How to Read Mueller HbMag MagMeters

8-Digit "Sensus Protocol" -

Size	Gallon	Cubic Feet
3"	EXPn = +1	EXPn = +0
4"	EXPn = +1	EXPn = +0
6" and Above	EXPn = +2	EXPn = +1

Notes:

The HbMag always transmits eight (8) AMR digits.

The resolution is dependent upon meter size (diameter), according to the table above.

If finer resolution is desired, the HbMag may be programmed using the Siemens Flow Tools software (free download), and a USB/Infrared Transceiver Cable.
